

Blaze Rowland

Full-Stack Web Developer

Development and Design is constantly changing and that gives me something to work for and learn about every-single-day. There's something special about researching what you love and Development for me, is just that.

Development Work Experience

BDM Computers

APR 2017 - PRESENT

OWNER / LEAD DEVELOPER

BDM is the branding for my Freelancing work. This allows me to work on my passion of development and design while still maintaining a full-time job elsewhere.

- Design & Develop Web Applications
- Client Communication
- Project Management
- Client Outreach

Grain Journal

MAR 2016 - MAY 2016

INTERN

I was given this opportunity by a professor who saw a lot of promise in my work. He pulled some strings to allow me an internship for the remainder of the semester.

- Website Maintenance
- Video & Sound Editing

Staples

DEC 2015 - MAY 2016

COMPUTER TECHNICIAN

Working on / with computers has been one of my favorite things to do since I was little. Having the ability to do this everyday and work on my salesmanship was wonderful.

- Computer Repair
- Virus Removal
- Diagnostics
- Customer Service
- Electronic Sales
- Detailed Notes for Other Workers

Lily Dev Shop

APR 2015 - AUG 2015

INTERN

After posting on a sub-reddit trying to find myself some freelance work (prior to branding as BDM), I was contacted by a start-up agency who offered me an internship after seeing my passion.

- Web Programming
- Debugging others Code
- PSD to HTML
- Git - Version Control
